

# CareMore Pharmacists

Do you ever wonder if you actually need all the medications you're taking?

**As trained medication experts, CareMore pharmacists can help you answer that question.**

As a valued CareMore patient, you have access to highly-trained, board-certified pharmacists ready to go above and beyond to serve you.

We work closely with your personal doctors to make sure you're taking the medications that are right for you.

Our goal is not just to make sure you're taking only the prescriptions you need and taking them correctly, but also that you're getting the best results.

**Drug costs for older adults on fixed incomes can become a burden.**

We walk with you throughout your healthcare journey, so based on your entire patient history, we can be certain you're only taking what works—which can help you save money.

---

**CareMore pharmacists help ensure that:**

- You are prescribed only the medications you need
- You are taking the right medications at the right times
- Your medications do not negatively react with one another
- You are not spending more than you need to on your medications

**So before you take another two of these...**
